PROFESSIONAL SUMMARY

Software Engineer II with 3+ years of experience building and scaling backend systems for a high-traffic assessment platform serving 1,000,000+ exams annually. Proven track record of driving cost optimization and cloud migration initiatives, containerizing services with Docker/Kubernetes on Azure, and collaborating across cross-functional Agile teams.

WORK EXPERIENCE

Pearson

Software Engineer II

Bloomington, MN

August 2026 - Present

- Led migration of a legacy SOAP-based service to a RESTful API architecture, modernizing service interfaces and improving maintainability and integration flexibility across consuming teams.
- Designed and implemented event-driven architecture for the migrated service using Azure Service Bus, enabling asynchronous event production/consumption and decoupling service dependencies.
- Architected the service's data layer using Spring/Hibernate ORM, ensuring clean domain modeling and maintainable persistence logic during the SOAP-to-REST transition.
- Mentor engineers on distributed, event-driven system design and debugging for delivery-critical workflows.

Software Engineer I

January 2025 - Present

- Built RESTful APIs using Spring Boot for a high-traffic assessment platform delivering 1,000,000+ exams annually.
- Containerized services and managed deployments using Docker and Kubernetes within Azure Cloud environments.
- Spearheaded a cost-optimization initiative by migrating data storage from CosmosDB to MySQL, achieving 50% reduction in cloud database costs.
- Collaborated with 4 teams of 20+ engineers in a fast-paced Agile environment to deliver monthly feature-driven PROD release.

Software Engineer Intern

June 2023 - January 2025

- Collaborated with a team of 6 developers to process over 15 user stories and defects weekly, actively contributing to the iterative development process following Agile and Scrum methodologies.
- Participated in daily stand-up meetings, providing progress updates and discussing roadblocks, cultivating effective communication and teamwork within the development team.
- Contributed to troubleshooting and debugging software issues, leading to a 25% decrease in overall software defects and enhancing the application's stability.
- Played an integral role in the software release process by contributing to the planning, development, and deployment of releases, ensuring timely and successful product launches.

University of Minnesota-Twin Cities

Undergraduate Teaching Assistant

Minneapolis, MN

January 2023 - May 2023

- Facilitate lab sessions, enhancing hands-on learning and practical understanding for students.
- Grade assignments with detailed feedback, aiding students in identifying and correcting errors.
- Introduce new educational tools, boosting student engagement and participation in lab activities.
- Analyzed student performance data to tailor feedback, improving individual student outcomes and overall class averages.
- Mentored students during office hours, providing personalized guidance and fostering a supportive learning environment.

EDUCATION

University of Minnesota-Twin Cities

Bachelor of Science in Computer Science

Minneapolis, MN

September 2021 - May 2024

SKILLS

LANGUAGES: Java, Python, TypeScript, SQL, JavaScript, React, Angular

BACKEND/ARCHITECTURE: Spring Boot, Hibernate/JPA, REST, Service Oriented Architecture, Event-Driven Architecture, Microservices

CLOUD/MESSAGING: Azure, Azure Service Bus, Kubernetes, Docker, Terraform

DATABASE: PostgreSQL, MySQL, MongoDB, NoSQL

TESTING/TOOLS: Git, GitHub, Bitbucket, JUnit, Postman, Testfully, Maven, Gradle

METHODOLOGY: Agile, Scrum, Jira, Confluence
